FlowPilot Quick Start Guide

From first login to your first working sales pipeline

CUSTOMER ONBOARDING | SPEC LEARNING PROJECT

YOUR GOAL

Complete the five setup steps and finish with one live pipeline and one simple automation.

1

Create your account

Confirm profile, company name, timezone, and notification preferences.

2

Set up your workspace

Add your team, choose access levels, and define the default sales process.

3

Import your contacts

Upload a CSV and map name, email, company, and owner fields before importing.

4

Build your first pipeline

Create stages that match how your team actually moves opportunities from lead to close.

5

Create one automation

Trigger a follow-up task when a deal moves into Proposal.

SUCCESS CHECK

- ○ Find a contact inside the CRM
- ○ Move a deal through pipeline stages
- ○ Explain what the automation triggers and why
